## BLOCK CONSTRUCTION

Sess all rights sides together with $1 / 4$ "seam allowance. Press open.

- All sewing is right sides together with $1 / 4$ seam allowance, unless noted otherwise.
- Start by joining the rectangular or square pieces in order to obtain the horizontal rows of the blocks, looking at the diagram. Join the composed horizontal rows vertically, as shown in Diagram 1 - 3 to compose the blocks.
- Press seams either open or to one side, upon your preferences. Pressing the seams open eliminates bulk and makes it easier to match the seams.

## QUILT ASSEMBLY

Sess rights sides together.

- Place BACKING FABRIC on a large surface wrong side up. Stretch it with masking tape against that surface.
- Place BATTING on top of backing fabric.
- Place TOP on top of the batting with right side facing up. Smooth away wrinkles using your hands.
- Pin all layers together and baste with basting thread, using long stitches. You can also use safety pins to join the layers.
- Machine or hand quilt starting at the center and working towards the corners. Remember that quilting motives are a matter of personal preference. Have fun choosing yours!
- After you finished, trim excess of any fabric or batting. squaring the quilt to proceed to bind it.

## BINDING

Sew rights sides together:

- I suggest doing the Double Fold Binding, which has double thickness.
- Cut enough (7) strips $21 / 2$ ' wide by the width of the fabric F to make a final strip $276^{\circ}$ long. Fold and press the long binding strip in half widthwise (on the shorter side), wrong sides together.
- Cut the beginning of the binding strip at a 45 degree angle. Start sewing the binding strip in the middle of one of the sides of the quilt, leaving an approximated $5^{\prime}$ tail loose. Sew with $1 \not 14^{\prime}$ ' seam allowance (using straight stitch), aligning the strip's raw edge with the quilt top's raw edge. Pin in place if needed. When your needle is $1 / 4^{\prime \prime}$ from the corner. Turn the quilt and stitch off at a 45 degree angle and stitch reaching the end of that corner (diagram 1).

## stop

diagram 1

- Turn the quilt and fold the strip in a motion of $45^{\circ}$ and upward, pressing with your fingers, using the angled stitch as your guide (diagram 2). Hold this fold with your finger, bring the strip down in line with the next edge, making a horizontal fold that aligns with the top edge of the quilt (diagram 3). Start sewing at $1 / 4^{\prime}$ of the border, stitching all the layers. Do the same in the four corners of the quilt.
diagram 2

diagram 3

- When approaching the starting point, stop stitching at least $10^{\prime \prime}$ from where you started, leaving another tail, at least 6" long. There will be a gap between the stitched bindings. Unfold the ending binding and align it nicely with the quilting edge. Open the ending strip toward the quilt, right sides together and place the beginning of the binding strip that is cut at 45 degrees inside the open part of the ending binding strip. Using a pencil or a pin, mark the line on the ending binding strip where the beginning piece lays (diagram 4). Mark another parallel line to the first one, precisely $1 / 2$ " distant, so that it can be lined and sewn perfectly with the other end, using 1/4 seam allowance. Pin and sew the ends, right sides together (diagram 5). Press the seam open and finish sewing that remaining binding piece onto the quilt edge.
- Turn binding to the back of the quilt, far enough to cover the trimmed edges and stitch by hand using blind stitch.
